

BEECHINGS

distinctive landscaping

Beechings is an award winning landscape design and contracting company creating eye catching, distinctive landscapes for individual and corporate clients since 1946. The company draws on its years of experience to transform any outdoor space – irrespective of size or location – into an inspirational, unique environment to fit lifestyle and budget.

The Urban Garden

A city garden, no matter the size, is prized outdoor space. Beechings understands the value of this space and creates distinctive, personal gardens offering escape from the bustle of urban life.

Traditional and contemporary materials, striking structural plants, combined with creative landscaping, underpin Beechings garden design. All these elements can be moulded to transform your garden into a modern, functional living space, perfect for working and entertaining.

“Before the garden was just a grassy area lacking any interest. We wanted to extend our living space, increase our privacy and have something different – this is perfect.”

The Roof Garden

Roof and terrace gardens are increasingly popular and Beechings can work with you to create a personal outdoor space high in the cityscape. Maximum use can be made of all available space, with plants and installations working with the roof or terrace to form a unique garden far above the street.

Beechings has worked throughout London and other major cities bringing creative solutions to redundant roofs and terraces. From working with leading property companies to crafting individual bespoke solutions, Beechings' designs enhance lifestyle and add value to property.

The Country Garden

Beechings is at the forefront of designing and building eye catching country gardens. From bold planting programmes and installations to sweeping lawns, patios and childrens' play areas – a Beechings country garden is a versatile and graceful extension to your home.

Themed gardens such as Japanese, feng shui, water, wildflower and organic are also possible. Beechings has extensive experience in this area and can draw upon specialist consultants to create gardens specifically to requirement.

“Two thirds of homebuyers say an attractive garden is the tops when looking for a new home. Only the number of bedrooms is considered more important – by a margin of just one per cent.”

THE EXPRESS

Country Estates

Working both in the UK and abroad, Beechings designs and builds country estates and gardens with style and presence.

In creating the contemporary or restoring faded parkland and grounds, the company can incorporate features traditionally found on the estate. From herb and secret gardens to parterré, lakes and gazebos – Beechings can work with you to form a highly individual and graceful landscape.

To keep estate grounds and gardens in prime condition and trouble free for the owner, a full maintenance and upkeep service can also be provided.

Commercial & Civic Spaces

Beechings has extensive experience of working with local Government, public services and business to produce award winning landscapes that benefit community, corporate and local environment.

The company provides full client liaison and onsite management, working to and within, project time frames and programmes, meeting budget, deadline and specification.

From installing wildlife ponds along the route of the Channel Tunnel rail link, to building an interactive garden for occupational therapy at The Royal London Hospital, Beechings has the experience and drive to deliver award-winning results.

Red Gates, London, is a school for 66 children with severe learning difficulties.

Beechings, working with leading landscape architect Robert Petrow, transformed a drab courtyard into a multi-sensory play area – winning the British Association of Landscape Industries (BALI) national award for schools.

“The children are enthralled and motivated. The sensory garden will provide a valuable stimulating curriculum resource for the school as well as other primary schools in the area,” said head teacher, Sue Beaman.

“The standard of construction and overall finish was excellent. This scheme expertly demonstrates the commitment of the contractor to provide the best possible environment for the children and all their varying needs.” BALI

The Croydon Tramlink, a key public transport resource for South London, was constructed in 1999. Appointed by the Council, Beechings undertook a two-year project of trackside ground preparation, planting and maintenance along its route through the town centre.

Working closely with the main contractor during the Tramlink's construction, Beechings managed the planting and aftercare of over 7,000 container grown shrubs, 6,800 bulbs and 30 semi-mature trees including Walnut, Sugar Maple, Lime and Whitebeam. Beechings continues to manage the maintenance and care of the plants and trees.

Individual Services

A full range of contracting services for both home and business are available. From tree surgery and planting programmes to the construction of patios and drives, Beechings provides a comprehensive solution including full consultation and onsite management.
